BELL MEMORIAL HOSPITAL ISHPEMING, MI

A new 102,427 SF hospital with attached 44,244 SF medical office building was completed in September 2008 at a cost of over \$35 million dollars.

The project won the Facility of the Month award from HC&O News in Jan/Feb 2009.

Prior to the new building construction, Bell Memorial Hospital was the oldest active hospital in Michigan. The new hospital was envisioned to allow Bell to provide a modern healthcare delivery system that is better suited to meet a changed national healthcare delivery system.
