Studio 27
Architecture

KIPP CHARTER SCHOOL WASHINGTON, DC

New 65,000 square foot, 3 story elementary school and gymnasium with estimated \$10.4 million cost.

The structural system of the roof consists of metal deck on steel bar joists. The floor framing primarily consists of concrete on form deck over bar joists. The bar joists at each level are supported primarily by load bearing masonry walls. At the gymnasium, the floor system is a concrete slab over composite metal deck and steel beams. The lateral

system consists of reinforced masonry walls.
