MANEUVER CENTER HEADQUARTERS FORT BENNING, GA

Design and construction of a 141,354 SF office building in Fort Benning, GA. The structural framing system for the building is structural steel. The foundations are shallow spread footings founded on geopiers. The structure was designed to meet DoD progressive collapse and blast requirements. Coordination of design between consultants was achieved using BIM software. The building was awarded using the Design/Build project delivery method and at an estimated

construction cost of approximately \$39 million.
