OUR LADY OF HOPE CATHOLIC CHURCH POTOMAC FALLS, VA

The design and documentation of a two story, 32,500 SF church with two partial mezzanines, a two story, 30,000 SF school with gymnasium, classrooms, media and support rooms, and a two story, 7,000 SF rectory with a basement and garage. The construction of the church is a steel framed roof system and a composite concrete steel system with a masonry exterior. The construction of the school is a wood truss roof and a bar joist floor system with masonry

walls. The rectory consists of conventional residential wood framing.
