SK&I Architects

2201 N. PERSHING DRIVE ARLINGTON, VA

A new approximately 400,000 SF mixed use residential project. The project includes 188 residential units in about 210,000 SF, 35,000 SF of retail space and the remainder as parking. The residential portion is three and four story wood frame with wood truss floors on stud bearing walls and a masonry veneer. The floor between the residential and retail/parking is a concrete transfer slab as is the main level with parking below.
